

Lime and the United Nations Sustainable Development Goals (SDGs)

Lime supports the Sustainable Development Goals

Lime fully embraces the UN Sustainable Development Goals, and below are a few of Lime's initiatives answering the UN's call to action.

Goal

Our Contribution

Our actions contribute to SDG 3 by improving public health outcomes related to transportation.

- Enhancing walkability and health by providing access to shared micromobility services
- Supporting safer, more walkable cities and road safety, while providing data for cities to make effective safety infrastructure improvements
- Prevented more than 120+ million local particulate-producing private urban motor vehicle trips through the end of 2024

Lime's mission directly support the transition to clean energy.

- Procure 100% renewable energy for charging all shared fleet and all Lime facilities
- Procure local renewable energy in more than 50 local markets around the globe
- Transitioned 70% internal operations fleet from gas/diesel to electric operations and the utilizing zero emissions port-to-hub drayage

Lime provides access to safe, affordable, accessible and sustainable transport, including enhancing access to public transport.

- Provided 1+ billion rides to date with 17.8+ million equity trips through Lime Access
- Riders have avoided 120+ million car trips through the end of 2024

We're committed to building a circular economy and reducing waste from our operations.

- Reduced the life cycle impacts of shared vehicles by 80%+ through in-house design and repair, extending the lifespan of vehicles
- Can achieve 97%+ recyclability of vehicle parts and utilize in-house refurbishment globally
- Report annually on company's carbon emissions as well as social impact programs
- Supporting sustainable tourism

Our efforts to reduce our carbon emissions and promote sustainable transport are central to addressing the global climate crisis.

- -66.8% carbon intensity reduction in 2024 (2019 baseline) as part of validated science-based net zero target
- -76.5% Scope 1 and 2 absolute reduction and -63.1% Scope 3 intensity reduction in 2024
- Employ global awareness campaigns on transportation's climate change impact

Lime's actions extend beyond environmental and urban policy to support community and democratic engagement.

- Provided 119k+ global free Lime to the Polls trips across multiple countries in local and national elections
- Strong civic partnerships across more than 250 city government institutions and 100+ Lime Hero civil society community partners
